PROJECTS

Face Recognition Attendance System

Description: Created a sophisticated **Face Recognition Attendance System** using **HTML** for an intuitive Graphical User Interface (GUI) and **Python** for seamless integration of facial recognition algorithms with OpenCV. Implemented **machine learning**, including Convolutional Neural Networks (CNNs), to continually enhance accuracy. The system offers a user-friendly interface for efficient and reliable **automated attendance management**.

Role: **Frontend**

Team size: **4**

Using Technology:

Frontend :- **HTML, CSS**

Backend Framework:- **Python, Machine Learning**

Contact Management System

Description: Developed a Contact Management System using **C++** on the **VSCode** platform. Implemented features for adding, editing, and searching contacts. Utilized **object-oriented programming** principles to ensure efficient data management and user-friendly interface.
